WHY DO YOU NEED TESTOSTERONE ?

- Mood elevation
- Sex drive
- Beard growth
- Deep voice

- Strong bones
- Body hair
- Increased muscle mass
- Erectile function
- Sperm production

LA CARENCE EN TESTOSTÉRONE CHEZ L'HOMME

→ moins de muscle, plus de ventre, moins de peps?

Colloque du 16.9.15

Dr C. Waeber Stephan

La testostérone, moteur de la libido des femmes

Par Sophie Bramly

Publié le Mardi 08 Janvier 2013

De toutes les hormones présentes dans le corps de l'homme et de la femme, la testostérone est celle dont on parle le plus : elle est dans notre imaginaire celle qui correspond à des valeurs viriles, elle est synonyme de force et de puissance. Elle est pourtant bien plus que cela pour l'homme, et pour la femme également.
